Model No. WF-LAMP-CAM

WiFi Spy Camera Desk Lamp HD 1080P

Looking for a remote access spy camera that you can put into any room without raising any suspicion? Well here it is. What could be better than a fully functional desk lamp.

Built into the desk lamp is a concealed WiFi module plus a 2 megapixel pinhole camera and mini microphone. Live view this camera from your phone or PC from anywhere in the world and remotely playback motion detected video and audio recordings. Record to internal memory and remotely rotate the camera up to 330 degrees left to right.

If you have any concerns about introducing something new into a home or office, a Nursing Home perhaps, what could be better? It's fully functional as a multi coloured desk lamp whilst the light colour and brightness etc can be altered as you choose direct from your free mobile phone App. No internal battery as this Desk Lamp is designed to be 240V powered and we provide a 5V USB Australian power supply with this covert hidden camera.

Provided you have WiFi available wherever the camera is located (you need to know the WiFi router password) then you have complete remote access to the camera from anywhere in the world and from any web-enabled device.

[Tell me more](#)

Ideally suited to homes, offices, warehouses, bedrooms etc you name it. As a matter of interest this fantastic WiFi Desk Lamp camera a very covert pinhole megapixel camera built in. To the naked eye no one but no one will find it. After all, this real and fully functional Desk Lamp so to any prying eye, who would take any notice or even suspect.

When remote accessing the camera from your mobile phone, the entire camera head can be silently rotated up to 330 degrees left or right. Impressed...I thought so but wait there's more. No Glow Invisible IR (Infra Red) night vision. Yes that's right, this camera can see and record even in a totally dark environment using built in night vision up to 3M from the camera.

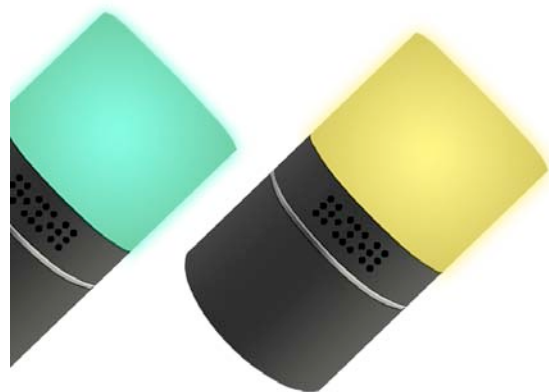

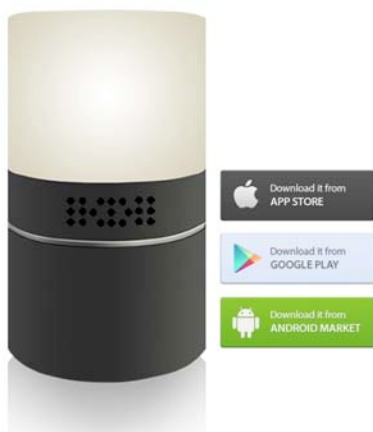

The desk light can be switched on and off from your free mobile phone App. Furthermore the App also controls brightness and preferred colour glow. Playback recordings remotely or remove the concealed SD card to replay motion activated recordings direct to your PC or MAC.
