Model No. WF-GLASS

WiFi 1080P HD Spy Cam Glasses

Just when you thought you had seen it all, along comes our WiFi 1080P HD Spy Glasses. That's right you can wear the glasses and realistically someone on the opposite side of the world can be watching LIVE what you see and hear. Need more, what about having a two way conversation with that person and discreetly recording in HD 1080P quality. Years ago this was all pie in the sky James Bond stuff but now.....yes it's a reality.

Supplied with a rechargeable lithium battery which can keep the WiFi camera functional for 4 hours or more but it can also be connected to a power point for long-term function if power is handy. If power is switched off it will still function for 4 hours regardless. That means you don't need to worry about the battery going flat.

Provided you have WiFi available wherever the camera is located (you need to know the WiFi router password) then you have complete remote access to the camera from anywhere in the world and from any web-enabled device. Our Free App is available for Iphone and Android.

If on the other hand you are sharing a local WiFi network, then you have no need for a router password as these spyglasses also support P2P mode. In other words if you are carrying a mobile phone in your hand, or someone else (must use the camera password provided with your order) then theoretically you could be communicating with another person in same WiFi hotspot and be both watching and recording direct to your phone.

There are 2 remote access functions;

- P2P mode (sharing local WiFi network)
- WiFi mode live viewing from anywhere in the world.

In WiFi mode with remote access then you must have know the WiFi router password. P2P mode on the other hand doesn't require the router password; just the camera password so there is a difference between the two modes. This device supports both. Blue anti glare lenses are optional and need to be pre ordered unless in stock. Otherwise the lenses are clear and look like reading glasses.

How does it work and what about the battery life?

From the users point view, don't be concerned about other WiFi users being able to see the spy camera online, that won't happen. Only those authorised and password protected can see the camera live in P2P mode and in WiFi mode. WiFi will make NO reference to anything hidden it will simply be a series of numbers and letters which to anyone else is meaningless.

As you can see in the image above, the left arm of the spy-glasses can be removed. Inside that arm holds the micro SD memory card up to a huge 128GB capacity and it houses a lightweight miniature rechargeable lithium Ion battery.

We provide 2 arms with each camera and each arm can keep the camera functional for approximately 1 hour. Obviously with 2 batteries you have 2 hours. Additional battery arms can be ordered separately.

Touch Control

Features

Covert & undetectable highly concealed colour pinhole camera

2.0 Mega Pixel CMOS Lens

HD 1080P 1920 x 1080

Wi-Fi P2P Live streaming Video Motion detection and mobile phone push alert messages

280mA built in 60 min rechargeable battery

2 x battery legs for approx. 2 hours functional time

Touch operation no buttons to press

H.264 Video Compression

Supports Max 128GB Class 10 Micro SD Card

Features

WiFi Live Streaming video
P2P LAN view 50m without blockage or interference
Motion detection & Push alarm messages
Image Sensor : 2.0 mega pixel CMOS lens
Video resolution: FHD 1080P (1920 x1080) pixel @ 30fps
Chipset:Hi3518E V200
Lens:OV9712
Video Resolution: 1920 x1080
Frame: 25FPS
H.264 compressed format
Lens angle: 70 degree
Support Micro Class 10 or better SD card 4GB-128GB (optional)
Built-in battery 280MA
Charge time: About 80 minutes
Working time: About 60 minutes
Computer operation system: Windows
Mobile phone operation system: Android/iOS
Web browser: IE7 and above,chrome,firefox safari.etc
1mins/ around 19MB, 52 mins/1G

Packing List

1 x Clear Lens reading like Glasses
2 x Eyeglasses Legs
1 x English Manual
1 x USB Charging Cable
1 x Cleaning Cloth
1 x Micro SD Card reader

Dimensions

Product size: 14.9 x 15x 4.4cm
Box Size: 17.5 x 9.4 x 4.4cm
Weight of a Unit :0. 2(KG)

280mA 75mins Battery
