Model No. WF-AIR-CAM

## WiFi Air & Gas Detector 1080P Spy Camera

This is a small cylinder shaped device is designed for Heat and Air Quality detection alert. However, also built into the black plastic composite cylinder is a WiFi module plus a 2 megapixel pinhole camera and mini microphone. Live view this camera from your phone or PC from anywhere in the world and remotely playback motion detected video and audio recordings. The camera head can be remotely rotated up to 330 degrees left or right thus allowing the user to scan an entire room undetected. It can function on both it's internal rechargeable battery for up to 10 hours or with a 5V power supply that we provide with each camera system.

Built into the cylinder is not just an Air Quality detector but an internal rechargeable lithium battery, which can keep the device and WiFi functional for 10 hours or more or connected to a power point for long-term functionality provided power is handy. If power is switched off it will still function for 10 hours. That means you don't need to worry about the battery going flat.

Provided you have WiFi available wherever the camera is located (you need to know the WiFi router password) then you have complete remote access to the camera from anywhere in the world and from any web-enabled device.

### **Tell me more**

Ideally suited to homes, offices, warehouses, sheds etc you name it. As a matter of interest this fantastic WiFi Air Quality Detector has a very covert pinhole megapixel camera built in. To the naked eye no one but no one will find it. After all, this real and fully functional so to any prying eye, who would take any notice or even suspect?

When remotely accessing the camera from your mobile phone or PC, the entire camera head can be silently rotated up to 330 degrees left or right. Impressed...I thought so but wait there's more. No Glow Invisible IR (Infra Red) night vision. Yes that's right, this camera can see and record even in a totally dark environment using the built in night vision up to 3M from the camera.

### **Specifications**

- 330 degree Rotatable Lens
- 5000MA build-in battery
- Invisible night vision 3M
- Two way speaking
- Temperature and humidity display and alarm on APP
- Gas alarm on APP remotely
- WiFi Live Streaming video
- P2P LAN view in 50m without block
- Motion detection & Push alarm messages
- Chipset : Hi3518E V200
- Lens : OV9712
- 2.0 mega pixel CMOS lens
- Video resolution (on APP): 1920 x 1080
- Frame: 25FPS (real time)
- H.264 compression

## Features

- Temperature & Air Quality Alarm
- 2.0 Mega Pixel CMOS Lens
- HD 1080P 1920 x 1080
- 3 meters invisible night vision
- Wi-Fi P2P Live streaming Video
- 330 Degree remotely rotational wide view lens
- H.264 Video Compression
- Motion detection & Phone Push notification
- Two Way Audio speaking
- Internal 5000mA Rechargeable battery
- 10 hours battery once fully charged
- Supports Max 128GB Class 10 Micro SD Card
- Wide angle 90 degree fixed pinhole lens

## Amazing Rota-table Lens

330 Degree Secure whole angle by App

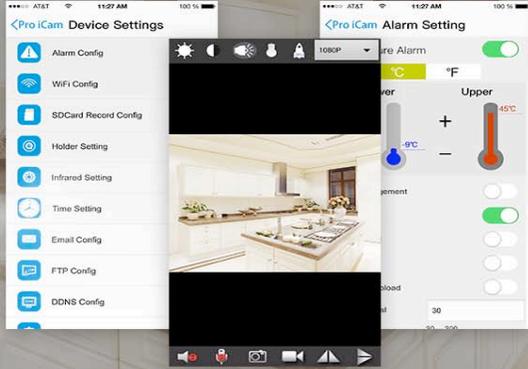

## P2P Wi-Fi Live Streaming

Smart Home and business security remotely

# Temperature and Air Alarm

Make Home Security more Easily by App

# 3 Meters Invisible Night Vision

Protect Your Home In All Directions.

## Product instruction

## Full Pro HD 1080P

2.0 Mega Pixel COMS Lens High Resolution
