WiFi Stereo Music Speaker & Wireless Phone Charger 1080P HD Spy Camera

If seeking a WiFi HD Spy Camera product that is highly advanced and actually a great product to have anyway, look no further this is an absolute must have device. Here we have an extremely nice looking digital Clock but also built in are amazing stereo speakers not to mention a wireless Qi (pronounced chee) mobile phone charger. Can you believe it !!

Cleverly hidden inside the Clock Charger is a WiFi module plus a 2-megapixel pinhole camera and a mini microphone. Live view this camera from your phone or PC from anywhere in the world and remotely save or playback motion detected video and audio recordings. Absolutely amazing stuff and so covert !!

This digital Clock is so much more than just a clock. It's almost like the reason for buying it for a specific purpose (and by that I mean the hidden camera and WiFi) play second fiddle to the **Bluetooth Stereo Speaker system and Wireless Phone Charging.**

If you ever had any concerns about introducing something new or foreign into a home or office, workshop or anywhere that you have some sort of concern, I really can't think of anything better and so useful for other purposes as well. It's after all fully functional as a stereo music speaker so it can play music stored on your mobile phone (sounds brilliant by the way) has an internal rechargeable lithium battery that can keep the speaker and WiFi functional for several hours or more but it can also be connected to a power point for long term functionality.

Provided you have WiFi available wherever the camera is located (you need to know the WiFi router password) then you have complete remote access to the camera from anywhere in the world and from any web-enabled device.

Tell me more

Ideally suited to homes, offices, warehouses, sheds etc you name it. As a matter of interest this fantastic WiFi Clock, Speaker & Wireless Phone Charger camera has a very covert pinhole 2.0 megapixel camera with audio microphone built in. To the naked eye no one but no one will find it. After all, this is a real and fully functional so to any suspicious eye, who would take any notice or even suspect its real purpose.

The covert of hidden camera lens has a very wide 140-degree field of view so ideal for any size room or office etc. No Glow Invisible IR (Infra Red) night vision. Yes that's right, this camera can see and record even in a total darkness up to 6m from the camera using built in night vision.

How do I know if my Iphone or Android supports Wireless charging?

Most modern or new mobile phones support wireless charging but not all phones. To understand which phones support wireless charge charging and which model phone requires an optional charging accessory, please see the following links;
