Wireless Solar Gate & Driveway Alert

The Wireless Gate Alert kit is a simple DIY solar powered point to point photo-electric invisible beam which can be up to 40m apart. When the beam is broken by a person or vehicle, the mini built in transmitter sends a wireless signal up to 800m or more (optional long range antennas) to a dual channel receiver as pictured above. The receiver sounds a “beep beep” tone announcing that the perimeter beam has been breached. **Warranty – 3 Years!**

Wireless Solar Gate & Driveway Alert

This unique device is an amazing concept when we take into consideration the huge range of applications for homes, sheds, business premises, driveway gates, farms and large properties, machinery in remote areas, vineyards and so much more.

So what sets it apart from anything else even remotely similar? In many instances it's impractical or impossible to run cables and/or power to the area of concern. As an example, let's say we are talking about a driveway gate although it could be anything.

Farmers and vineyard owners will often complain that a vehicle was driven up to the homestead and suddenly without warning there is a knock at the door, or the vehicle has simply turned away and left the property. An early warning audible and/or visual alert to driveway or gate activity would have been most welcome and to some degree comforting knowing that a person or vehicle was approaching.

Once a person or vehicle crosses or breaks the driveway or front gate beam which can be up to 800 meters away (up to 2.4ks with long-range antenna) the mini wireless transmitter sends a signal to the base receiver inside the house. The receiver sounds an audible semi loud tone thus announcing to the home occupier that someone is approaching or leaving the property. The beam sets are mounted on a post or other vertical structure, near the front gate and the two beams can be up to 40m apart. Aligning the beams with a string line (full instructions provided) any person handy enough to drill a few screw holes can mount the beams. In this regard, the Wireless Gate Alert is completely DIY so **no need for cables, power or an installer.**

The receiver is a 12V device about the same size as a cigarette packet. Connect the mini antenna to the receiver, plug into a 240V power point and its armed and ready to go. The receiver is a dual channel system meaning that an additional beam set can be installed in another area if desired. The base receiver is designed to emit a different tone for each of the two zones. Extra beam sets are available upon request.

What are some of the other features?

Our Wireless Solar powered Gate & Driveway Alert kit is available with a range of optional accessories including;

- GSM Modem
- Wireless Pocket Pager -Beeper
- Ability to switch on lighting or a siren using the receiver relay outputs
- Additional Beam sets available upon request
- Alerts to your mobile phone if the GSM modem is ordered
- Outdoor Siren or strobe lighting
- Long range antenna up to 2.5ks
- Repeater for even longer distance
- 3 Year Warranty
- Receive alerts on your mobile phone (arm and disarm remotely)
- IP66 rated (weatherproof)
- Can be interfaced with your alarm Panel
- Pocsag Paging kit up to 1k

Pocket Beeper-Pager

Product Functions

The optional **Pocket Pager** as featured above is very handy for a number of reasons. **Pocket Pager-Beeper** is a belt worn battery-operated device (smaller than a matchbox) that acts in the same manner as a base receiver. The T-shaped antenna also pictured is connected to the terminal output of our base receiver. If a person or vehicle passes through the Gate Alert Beam, a wireless signal is sent to the base receiver, which then uses the smaller antenna to transmit a signal to the pocket pager. Ideally the T-shaped antenna should be mounted on or near a window for added reception. **Range approx. 200m**

Perhaps you are not in the main house at the time someone drives through the main gate and therefore unable to hear the main base receiver tone. You could be 100m or more away from the main house, in the shed, gardening or hanging out the washing. The **Pocket Pager-Beeper** is designed to alert you to driveway or gate movement whilst on the move and away from the house.

In some cases the beam set is much closer and the customer could be just 50-150m maximum from the Gate Beam set. The beam set can communicate **directly** with the pocket pager meaning that a base receiver may not be required at all thus saving cost.

If you are not sure what to do, call 1300 763235 or email our office sales@hiddencamera.com.au and we will gladly answer any questions.

- Receive alerts on small Pocket Beeper when around the home
- Compatible with both 600-S and 700-F systems
- Receives alerts directly from any 600-S Beam-set without the need for a Base Receiver
- Interfaces with 700-F Base Receiver
- Up to 200m range

Wireless Monitoring of Vineyards & Orchards

**Do you want to increase production at your cellar door or tasting room while providing excellent customer service?
Do you want to be able to work in your vineyard or orchard and yet know when anyone arrives?**

Because of the amount of flora in an orchard or vineyard, anything wireless, relying on radio communication, can struggle. When it rains, the moisture on the leaves greatly restricts the range of wireless equipment.

We have developed a **Wireless Perimeter Alert system** to combat this very problem. Now it is possible to monitor your driveway, and receive alerts while you are out in the vineyard or orchard.

Our extended long range system includes a MegaBeam Antenna which increases the wireless radio range, but also allows the radio signal to travel above the tree-line. Now you have a reliable solution so you know whenever visitors arrive. The MegaBeam antenna can be located either at the house or at the location of the Beam-set.

Including a POCSAG Paging System allows you to receive alerts while you are away from the location of the Base Receiver. The POCSAG Long range Pager has a range of 1km.

The **Complete system** includes the MegaBeam Antenna and POCSAG Pager, and also allows you to receive alerts as text messages or a call to your mobile phone.

Wireless Monitoring of your Homestay or Resort

**Do you want to provide an exclusive experience for your customers?
Do you want to be alerted to the arrival of guests?
Do you want to qualify for a higher rating for your resort?**

Wireless Gate & Driveway Alert is the perfect solution to announce the arrival of anyone at your Homestay, Bed & Breakfast, Lodge or retreat.

With the use of a Pocket Beeper, staff can continue with their tasks and still meet guests as they arrive.

Unless the entranceway is more than a few hundred meters, our Standard or Complete kit will be the perfect solution. For longer distance driveway monitoring, check out Extended range

Wireless Monitoring of Dairy Farms

Are you having trouble with theft of milk, fuel or equipment? Would you like to know whenever anyone visits?

Wireless Gate and Driveway Alert is the perfect solution for monitoring both your farm equipment and dairy sheds.

With the use of our MegaBeam outdoor antenna, it is easily possible to monitor your gateways, dairy sheds or farm equipment – even if it is located a couple of km's away from your home.

The Beam-set can be installed across driveways and entranceways, but also across open ground.

How about a beam that spans the yard where you store your farm machinery?

The maximum beam length is 40m.

Wireless Monitoring of your Construction or Building Site

Are you having tools and equipment stolen from your work site? Is your building site being vandalized at night?

Wireless Gate & Driveway Alert is able to monitor the perimeter of your construction site and alert you remotely, via your mobile phone, if anyone crosses any installed beam.

Our Commercial system provides multi-beam monitoring. This enables you to be able to monitor the whole perimeter of a construction or building site. The Commercial System supports up to four Beam-sets simultaneously thus ensuring your equipment is safe and the site vandal free.

Ideal when used in conjunction with Solar Powered Graffiti Security Camera

For more information and pricing please contact us directly.

Wireless Monitoring of your Home

Do you wish to be made aware whenever anyone steps onto your property?

Would you like to be alerted if someone visits while you are out?

Wireless Gate & Driveway Alert **Lite System** has been specifically designed for residential installations.

With a 50m wireless range and a 40m beam-width, the Lite Alert system will monitor your driveway, or the front of your property.

Adding a Text Message Module allows you to receive alerts on your mobile phone when you are away from home. Now it is possible to have your privacy, be aware when anyone arrives – and have Peace of Mind when you are out.

Wireless Monitoring of Larger Properties

Do you want to monitor an entranceway a long way from the house?
Are you having trouble with theft at the other end of your farm?

Wireless Gate & Driveway Alert has been especially designed for very long-range applications.

With the use of our MegaBeam outdoor antenna, it is easily possible to monitor your gateways, dairy sheds or farm equipment – even if it is located a couple of km's away from your home.

The Beam-set can be installed across driveways and entranceways, but also across open ground. How about a beam that spans the yard where you store your farm machinery? The maximum beam length is 40m.

Outdoor Bell and Light Interface

- Enables alerts or incoming phone calls to be seen and heard outdoors
- Bell sound is pleasant and professional sounding
- Interfaces with any of our Base Receivers or standard telephone

PocSag long distance Pager

Product Features

- Receive alerts on a POCSAG Pager
- Compatible with both 600S and 700F systems (interfacing with Base Receiver)
- 1km range
- Individual Zone identification – displays up to four zones (ideal if you have multiple Beam-sets installed)
- Battery voltage monitor gives constant feedback on the health of the pager batteries

Long-Range MegaBeam Antenna up to 2.5k

Optional Accessories

This is the **Wireless Gate & Driveway Alert kit**. Additional beam set are available upon request.

Wireless **GSM Pocket Pager**

Outdoor 12V **Strobe Light**. An optional Siren is also available

The two images depicted here are real. They are;

- **MegaBeam** Long range 2.5k antenna
- Wireless signal **Repeater** with a more powerful solar panel. The repeater can extend range to 5ks or more.
