MegaPixel Cam

MegaPixel Cam is a High resolution battery operated surveillance camera which has the best video quality, 4 times better compared to traditional sports cameras in the market. Continuous recording at an amazing 1280*1024. Recording speed frames up to 25fps which is real time. The camera is about the size of a matchbox so quite small.

MegaPixel Cam

How does it work?

This new camera is perfect in so many way and uses such as, mobile surveillance, sports camera, spy camera, home surveillance, patrols, media use etc. Easy installation, easy to use and easy to mount.

The camera comes several mounts (see more info down the page) and with many features and options such as resolution of up to 1280 x 1024 (8fps) and 640 x 480 (25fps). You simply transfer the recorded data to your computer via USB cable or memory card. The camera has an overwrite feature meaning once the card is full it will recycle giving you the most amount of hours recordings.

Updated info for this product 09/12/09:

- The new motion detection feature has a detection range of 5-10 meters
- When plugged into power source either a power point or cigarette lighter socket, the device will work and charge at the same time, allowing the user to have constant surveillance without having to worry about battery life.
- You can view more information on this product as well as some sample video files from this [link](#)
- The package now includes several mounting options, see this [link](#)

There are several methods of recordings from which to choose and each is set on the rear of the camera. Simply press the type you want and then press record, it's that easy...

When you first turn the unit 'on' it will be in standby mode. Press the Mode button to select your preferred resolution and recording speed or frame rate. Select A or B LED as shown below to indicate the recording mode you require.

| Quality | A | B | Resolution |
|---------|-----|-----|-------------------|
| Highest | ON | ON | 1280 x1024 - 8fps |
| High | ON | OFF | 1280 x1024 - 2fps |
| Middle | OFF | ON | 720 x 576 - 25fps |
| Low | OFF | OFF | 720 x 576 - 2fps |

Using the higher resolution recording setting will result in larger file size and slightly slower recording. Remember 25fps (Frames Per Second) is real time but 12fps is cartoon speed. Still looks real but at only half recording capacity.

When you first turn the unit 'on' it will be in standby mode. Press the Mode button to select your preferred resolution and recording speed or frame rate. Select A or B LED as shown below to indicate the recording mode you require.

Power Supply

A built in Lithium Ion rechargeable battery 1100mAh/3.7V. MegaCam can be connected to PC USB, which in turn will also charge the internal battery and/or power the camera. MegaCam can be powered with external battery or power charger, or start recording as soon as the car ignition is switched on so plenty of options.

Power Charge Time: 2.5hrs

Continuous recording Time: 3.5hrs

Comparison Table Approximate Recording time Memory capacity card

| Resolution | Frames/sec | 1GB | 4GB | 8GB | 16GB |
|-------------|---------------|--------|--------|---------|---------|
| 1280 x 1024 | 8 Frames/sec | 2 hrs | 8 hrs | 16 hrs | 32 hrs |
| | 2 Frames/sec | 8hrs | 32 hrs | 64 hrs | 108 hrs |
| 720 x 576 | 25 Frames/sec | 2 hrs | 8 hrs | 16 hrs | 32 hrs |
| | 2 Frames/sec | 15 hrs | 60 hrs | 120 hrs | 240 hrs |

* Actual recording time and size of data varies depending on the kind of Micros SD card and its manufacturer.

* Recording time is proportional to the capacity of a Micro SD card.

* Recording time may be different according to the subject of recording. For instance if the recording view contains a great deal of activity, slightly more memory is required.

Micro SD Card Support

MegaCam use micro SD card for memory, support any capacity Micro SD card, like 32GB. Take the video file anywhere easily, play the video anytime, and make into DVR or VCD.

24 hours continus recording

MegaCam has the continuous function , build in Li-on battery, even the power supply is disconnected, it still can record with the lion battery power.

Mounting Options for cars, motors bikes and push bikes etc
