## Trackstick Pro

# Trackstick Pro

## How does it work?

The Trackstick Pro is a location based data logger that will record the entire route history of anything that moves. The Trackstick Pro is an effective solution for managing everyday commercial, fleet, or local and federal assets including police, parking enforcement, public transportation, street cleaning, utility, and other vehicles.

A low cost alternative to [Real Time GPS Tracking](#) devices with no monthly airtime fees, the Trackstick Pro records its own location histories for later retrieval with a computer through an integrated USB port. Detailed mapping and 3D satellite imaging reveal exactly where a vehicle has been. The Trackstick Pro continually records the date, time, location, speed, direction, and lengths of stops, temperature, and other valuable information to help manage moving assets more effectively.

A detailed mileage reporting system allows for better planning of routes, which can help reduce a company's fuel costs.

The Trackstick Pro can be permanently mounted on a vehicle in plain sight, covertly installed or removed from the cradle and placed on the dashboard. Power is supplied by the vehicle and an internal software alarm will time stamp any interruptions. Measuring only 2 1/2" X 2" X 3/4", the weatherproof case can be mounted via the cradle and screw pads.

## **SAVING FUEL & ENERGY**

### **TRACKSTICK PRO**

The perfect solution for individuals, fleet Tracking, Federal and Local government agencies looking for a way to track, record and validate the location of anything that moves. Detailed mapping and 3D [Real Time Satellite Maps](#) show the exact routes traveled to help plan a more fuel-efficient journey.
